

① Introduction to C++

② Info to STL → vectors / stack / queue / priority-queue / binary search / algorithm

③ Basic Info about
Order of time
Complexity.

④ Stack.

① Intro:-

How's C++ different
from C;

C → printf / scanf

C++ → cout / cin.

What technically order is
for $(n \gg 1)$

$O(f(n))$

$$O(n^2)$$

$$O(n)$$

$$O(f(n))$$

$$f(n)$$

$$O(n \log k + n) \approx O(n \log k)$$

$$f(n) \geq c g(n)$$

scanf("%d", &n)

↑

int

scanf("%ld", &n)

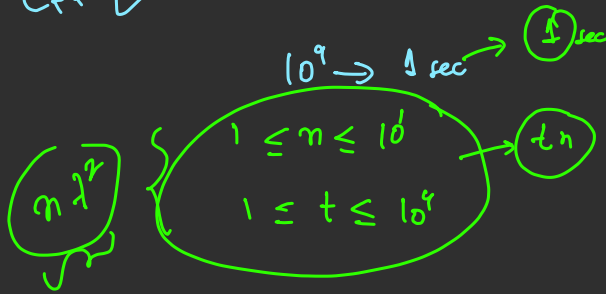

cin >> (n) → long int
→ int
shift

char s; scanf("%c", &s)

cin >> s

C++ ✓

vector

`#include <vector>`

`vector<int> arr;`

data type
char, string

$\text{arr}(n)$

arr

$\text{arr}[4] = \{1, 2, 3, 4\}$

`vector<int> arr = {1, 2, 3, 4}` $\textcircled{4}$

`arr.push-back(5)`

$\text{arr} = \{1, 2, 3, 4, 5\}$ $\textcircled{5}$

arr. pop(0);

{1, 2, 3} 11 2

arr.size() -

for (i = 0; i < n; i++) arr[i] = temp;

\bar{u} = temp Index

$$j = i + 1;$$

while $C_j < n/2$

$$a \sigma \tau_j < \text{temp} \} \xi$$
$$\text{sum} += (\text{temp} - \text{arr}[j]);$$
$$j + \frac{1}{2}$$

if (j == n); {

sum = c₁;

j = ~~i~~ + 1;

vector<int> arr;

sum += arr[top -

if ++i height(i);

$O(n) \rightarrow$

local mean
